**Framework for CPE Activity Types and Learning Objectives**

Relative to taxonomies of learning, ACPE CPE activity types fall along a continuum of learning, starting at Knowledge, moving through Application, and ending with Certificate. Learning across this continuum will generally progress from being more cognitive, theoretical and shallow with Knowledge-based activities to becoming more practical, applied and deep with Application-based and Certificate Programs, including additional elements from psychomotor and affective domains that emphasize the systematic application of content, skills and attitudes to real-life practice.

Suggested Verbs for CPE Activities by Domain

Creating
Ability to form new product/plan

Evaluating
Ability to judge value of material

Analyzing
Breakdown into component parts

Applying
Use of learned information in a new way

Understanding
Ability to explain ideas/concepts

Remembering
Recall of previously learned material
