

ACCREDITATION COUNCIL FOR PHARMACY EDUCATION
REPORT OF PROCEEDINGS
January 25-27, 2023

I. Public Interest Panel Review of Professional Degree Programs

The ACPE Public Interest Panel met on January 17, 2023, to discuss the professional degree programs scheduled for review by the ACPE Board of Directors during its January 25-27, 2023, meeting. Evaluation team reports and other materials associated with the evaluation of the professional degree programs were duly considered, and a report of the Panel's discussion was prepared and presented to the ACPE Board at its January 25-27, 2023, meeting. The Board considered the comments and recommendations of the Panel. Panel members who participated in the meeting of the Public Interest Panel were: Mary Donnelly, Tim P. Donovan, and Howell Todd.

II. Accreditation Actions for Professional Degree Programs, taken at the ACPE Board of Directors Meeting, January 25-27, 2023

A list of accredited professional degree programs of colleges and schools of pharmacy, which designates the respective preaccreditation and accreditation status of the programs and the academic year for the next currently scheduled evaluation, is posted on the ACPE web site at www.acpe-accredit.org.

Accreditation Actions

On the basis of self-studies, comprehensive and focused evaluations, communications received from the institutions, ongoing annual review of North American Pharmacist Licensure Examination (NAPLEX) passing rates, entry class size, and attrition and on-time graduation rates, as well as the comments of the Public Interest Panel, the Board of Directors determined the accreditation status of the following professional programs, along with preaccreditation and accreditation terms and conditions.

In order to be eligible for initial or continuing accreditation, the Doctor of Pharmacy program must be part of an independent College or School of Pharmacy or a College or School of Pharmacy within a University, which is regularly incorporated and is a legally empowered postsecondary educational institution. The institution housing the College or School, or the independent College or School, must be accredited by a regional accreditation agency recognized by the U.S. Department of Education, another agency acceptable to the Accreditation Council for Pharmacy Education (ACPE), or actively seeking such status and in good standing with that agency. Accreditation standards call for a College or School of Pharmacy as an organizational unit and the administrative structure of the College or School of Pharmacy must provide for a Dean, who serves as the chief administrative and academic officer. Evaluation for purposes of preaccreditation and initial or continued accreditation requires an invitation by the chief executive officer, or designate, of the institution.

An action to "affirm" implies that a previously established accreditation term has been confirmed. An action to "continue" implies that the accreditation date has been extended. The customary review cycle for established accredited programs is eight years.

The customary review cycle for new programs achieving initial accredited status is two years. The dates indicated in parentheses for each College or School are the academic year of the most recent determination of accreditation status and the academic year of the next scheduled comprehensive or focused review for determination of accreditation status, and thus define the present accreditation term for the Doctor of Pharmacy program. An (*) following these dates indicate a shortened accreditation term. An (**) following these dates reflects a 6-month extension due to the COVID-19 pandemic. The accreditation actions are as follows:

For Purposes of Considering Continued Accredited Status

Drake University College of Pharmacy and Health Sciences

Doctor of Pharmacy Program: Accredited status continued. (2022-2023) (2030-2031)
The ACPE Board of Directors finds the Doctor of Pharmacy program to be in compliance with all accreditation standards.

Review of Complaints

Ten complaints, with six complaints from either a student or faculty member from one of nine accredited Doctor of Pharmacy programs, were received during the fall 2022 cycle. Following the Board's review of each complaint, two complaints are open and awaiting additional information. All other complaints have been closed based upon the results of ACPE's investigation. The ACPE Board affirmed its policy to not investigate anonymous complaints unless there is a reason to suspect physical danger at the college/school or to the complainant.

Policy Updates

The ACPE Board of Directors approved an update to the Policies and Procedures Manual in January 2023 to add language in the annual monitoring policy for extended pathways. The updated manual can be found on the ACPE website at:
<https://www.acpe-accredit.org/pdf/CSPoliciesandProceduresJanuary2023.pdf>.

Standards Revision

ACPE began the standards revision process in fall 2022 using the stepwise process previously adopted by the ACPE Board. A report on work to date was provided at the January 2023 ACPE Board of Directors meeting.

III. Accreditation Actions for Providers of Continuing Pharmacy Education.

The ACPE Board of Directors accepted the report of the ACPE Continuing Pharmacy Education Commission at the January 25-27, 2023, meeting. Results of the evaluation of submitted applications and ACPE-accredited providers reviewed for reaccreditation by the Commission were presented to the ACPE Board of Directors in January 2023. These are depicted in these Report of the Proceedings as follows:

1.	<p>Accreditation of New Applications. Organizations seeking ACPE-accredited provider status are asked to submit an Application for Initial Accreditation. This application asks questions regarding the applicant's experience relative to areas addressed by ACPE's standards for continuing pharmacy education. Initial terms of accreditation are usually for a short term with a First Review in 1 year and a Second Review in 2 years.</p>

Policy Updates

Activity Types:

Continuing pharmacy education (CPE) activities are categorized into three types: knowledge, application, and certificate programs. After reviewing provider feedback and discussion, the ACPE Board of Directors approved to modify application-based activities to a minimum of 30 minutes and certificate programs to a minimum of 8 hours.

Application-based CPE activity. These CPE activities are primarily constructed to apply the information learned in the time frame allotted. Transmission of knowledge will serve as the foundation for the CE activity, however, if the emphasis of the CE activity is application of the knowledge (facts, content) and assessment of the learner to meet the learning objectives then the activity can be considered application. The information must be based on evidence as accepted in the literature by the health care professions. The minimum amount of credit for these activities is 30 minutes.

Certificate Programs. These CPE activities are primarily constructed to instill, expand, or enhance practice competencies through the systematic achievement of specified knowledge, skills, attitudes, and performance behaviors. The information within the certificate program must be based on evidence as accepted in the literature by the health care professions. The formats of these CPE activities should include a didactic component (live and/or home study) and a practice experience component (designed to evaluate the skill or application). The provider should employ an instructional design that is rationally sequenced, curricular based, and supportive of achievement of the stated professional competencies. The minimum amount of credit for these activities is 8 contact hours. The length of the Certificate Program should be determined on the level of skill required to achieve.

Continuing Professional Development (CPD):

The ACPE Board of Directors approved criteria for organizations to develop a *Continuing Professional Development Program*. In addition, *A Model for Continuing Professional Development Credit* was approved. ACPE staff will develop CPD policies and procedures. Educational webinars and workshops will be conducted during the summer and fall of 2023. Implementation of the CPD criteria and credit framework is planned for January 2024.

IV. Accreditation Actions for Joint Accreditation for Interprofessional Continuing Education™

ACPE made twenty-two accreditation decisions and nine progress report decisions for Joint Accreditation for Interprofessional Continuing Education™.

Eleven initial applicants achieved Joint Accreditation for Interprofessional Continuing Education. Of those, four providers need to submit progress reports within one year. One initial applicant did not receive joint accreditation. Four initial applicants who were previously accredited by one of the three founding organizations (ACCME, ANCC, ACPE) was awarded Joint Accreditation with Commendation.

Nine jointly accredited providers were reaccredited; three providers need to submit progress reports within one year. Two jointly accredited providers received Joint Accreditation with Commendation.

For providers who submitted progress reports: four jointly accredited providers demonstrated that all criteria have been brought into compliance, two jointly accredited providers need to submit a progress report, and one jointly accredited provider was placed on Probation with a progress report due next cycle.

These decisions have also been made by the Accreditation Council for Continuing Medical Education (ACCME) and the American Nurses Credentialing Center. The ACCME, ACPE, and ANCC collaborate to offer a single pathway for accreditation for organizations offering interprofessional continuing education (IPCE).

V. International-Accreditation and International-Preaccreditation Actions for Professional Degree Programs based outside the United States of America and its Territories:

International-Accreditation and International-Preaccreditation Actions

On the basis of self-study reports, interim reports, evaluation visits, communications received from the institutions, as well as the comments and recommendations of the ACPE International Commission, the Board of Directors determined the International-Accreditation Status of the following professional degree programs, along with International-Accreditation Term and conditions.

In order to be eligible for International-Accreditation or International-Preaccreditation, the professional degree program in pharmacy must be part of an independent school of pharmacy, a school of pharmacy within a university, or other structure approved by the Board. The school or university must be a postsecondary educational institution that is regularly incorporated, legally empowered, and authorized to award such a degree in accordance with national and/or regional laws and regulations. The institutional environment or setting for the professional degree program must be equivalent to a university and include a mission that encompasses professional education, scholarship, research, and service. To be granted International-Accreditation, the school of pharmacy must have graduated at least one class of students from the professional degree program in pharmacy for which International-Accreditation is being applied. Evaluation for purposes of granting or continuing of International-Accreditation or International-Preaccreditation by ACPE requires an invitation by the chief executive officer or designate of the institution.

To apply for International-Accreditation or International-Preaccreditation, a school must submit an application, a self-study report of the program, and any additional materials specified by ACPE. After receipt of the application, self-study report, and other required materials, a preliminary review of the application is conducted to confirm eligibility and evaluate the application. The findings and conclusions from the review are presented to the International Commission, which in turn makes a recommendation to the Board regarding authorization of an evaluation visit. If the Board authorizes an evaluation visit, it is scheduled in accord with standard evaluation and operational procedures.

A program applying for initial International-Accreditation may be awarded Provisional International-Accreditation by the Board. There are two categories of Provisional International-Accreditation - Category 1 and Category 2. It is possible for both categories to be awarded to a program; when this scenario applies, advancement to International-Accreditation is determined by both factors. Provisional International-Accreditation (Category 1) is awarded to a program if there are compliance issues. Provisional International-Accreditation (Category 1) is awarded for a maximum period of two (2) years; within that period, if the Criterion is brought into compliance, the program can advance to International-Accreditation. Provisional International-Accreditation (Category 2) is awarded to a program whose comprehensive initial evaluation visit was conducted using a virtual format (Virtual Site Visit or VSV). An on-site Verification Visit must be successfully conducted for the program to advance from Provisional International-Accreditation (Category 2) to International-Accreditation.

The customary term for programs granted initial International-Accreditation is two years. The customary review cycle (period between comprehensive evaluation visits) for established internationally-accredited

programs is six years. The dates indicated in parentheses for each school below are the academic year¹ of the most recent determination² of International-Accreditation Status and/or International-Accreditation Term and the academic year of the next scheduled determination of International-Accreditation Status and/or Term, and thus define the present International-Accreditation Term for the professional degree program.

The International-Accreditation Actions of the Board were as follows:

For Purposes of Considering Authorizing the Initial Evaluation Visit for International-Accreditation

The Board authorized evaluation visits to be conducted for the following programs:

**Ain Shams University, Faculty of Pharmacy, Cairo, Egypt

For Purposes of Considering Granting Provisional International-Accreditation

¹ For consistency, evaluation cycles and academic years are named in accordance with the standard terminology used by ACPE for accreditation and international-accreditation activities and reporting. Academic years run from July 1 to June 30.

² Determination includes granting of International-Accreditation Status, a change of International-Accreditation Status, a continuation of International-Accreditation Status (new Term), and other changes of an International-Accreditation Term (e.g., shortening); it does not include affirmation of an existing International-Accreditation Status and Term.

The Board granted Provisional International-Accreditation (Category 2) to the following programs:

**Arab Academy for Science, Technology, and Maritime Transport, College of Pharmacy, Alexandria and El-Alamein, Egypt
BPharm Degree Program (2022-2023) (2024-2025)**

**Ibn Sina National College for Medical Studies (ISNC), Pharmacy Program, Jeddah, Saudi Arabia
