

ACCREDITATION COUNCIL FOR PHARMACY EDUCATION
REPORT OF PROCEEDINGS
January 20-23, 2021

I. Public Interest Panel Review of Professional Degree Programs

The ACPE Public Interest Panel met on January 13, 2021, to discuss the professional degree programs scheduled for review by the ACPE Board of Directors during its January 20-23, 2021, meeting. Evaluation team reports and other materials associated with the evaluation of the professional degree programs were duly considered, and a report of the Panel's discussion was prepared and presented to the ACPE Board at its January 20-23, 2021, meeting. The Board considered the comments and recommendations of the Panel. Panel members who participated in the meeting of the Public Interest Panel were: Mary Donnelly, Deborah Kapp, and Howell Todd.

II. Accreditation Actions for Professional Degree Programs, taken at the ACPE Board of Directors Meeting, January 20-23, 2021

A list of accredited professional degree programs of colleges and schools of pharmacy, which designates the respective preaccreditation and accreditation status of the programs and the academic year for the next currently scheduled evaluation, is posted on the ACPE web site at www.acpe-accredit.org.

Accreditation Actions

On the basis of self-studies, on-site evaluations, communications received from the institutions, ongoing annual review of North American Pharmacist Licensure Examination (NAPLEX) passing rates, entry class size, and attrition and on-time graduation rates, as well as the comments of the Public Interest Panel, the Board of Directors determined the accreditation status of the following professional programs, along with preaccreditation and accreditation terms and conditions.

In order to be eligible for initial or continuing accreditation, the Doctor of Pharmacy program must be part of an independent College or School of Pharmacy or a College or School of Pharmacy within a University, which is regularly incorporated and is a legally empowered postsecondary educational institution. The institution housing the College or School, or the independent College or School, must be accredited by a regional accreditation agency recognized by the U.S. Department of Education, another agency acceptable to the Accreditation Council for Pharmacy Education (ACPE), or actively seeking such status and in good standing with that agency. Accreditation standards call for a College or School of Pharmacy as an organizational unit and the administrative structure of the College or School of Pharmacy must provide for a Dean, who serves as the chief administrative and academic officer. Evaluation for purposes of preaccreditation and initial or continued accreditation requires an invitation by the chief executive officer, or designate, of the institution.

An action to "affirm" implies that a previously established accreditation term has been confirmed. An action to "continue" implies that the accreditation date has been extended. The customary review cycle for established accredited programs had been six years but it was extended to eight years as programs were reviewed beginning with Board actions at the January 2012 meeting and beyond.

The customary review cycle for new programs achieving initial accredited status is two years. The dates indicated in parentheses for each College or School are the academic year of the most recent determination of accreditation status and the academic year of the next scheduled comprehensive or focused review for determination of accreditation status, and thus define the present accreditation term for the Doctor of Pharmacy program. An (*) following these dates indicate a shortened

accreditation term. An (**) following these dates reflects a 6-month extension due to the COVID-19 pandemic. The accreditation actions are as follows:

For Purposes of Considering Continued Accredited Status

Concordia University Wisconsin School of Pharmacy

Doctor of Pharmacy Program: Accredited status continued. (2019-2021**) (2027-2028)

The ACPE Board of Directors finds the Doctor of Pharmacy program to be in compliance with all accreditation standards.

Review of Complaints

Twenty-three complaints, all from either a student or faculty member from one of seventeen accredited Doctor of Pharmacy programs, were received during the fall 2020 cycle. Following the Board's review of each complaint, all but one complaint are closed based on the results of ACPE's investigation.

Policy Updates

The ACPE Board of Directors approved an update to the Policies and Procedures Manual in January 2021. The updated manual can be found on the ACPE website at: https://www.acpe-accredit.org/pdf/CS_PoliciesAndProceduresJanuary2021.pdf. The ACPE Guide and Policies for Virtual Site Visits was approved in July 2020. The policy can be found on the ACPE website at: https://www.acpe-accredit.org/pdf/ACPE_Guide_to_Virtual_Site_Visits_v2_Jan_2021.pdf.

Standards Revision

The ACPE Board of Directors authorized a Standards Revision initiative to commence during Spring 2021 and conclude with the release of new accreditation standards in June 2024, with implementation to begin on July 1, 2025. A stepwise outline of the revision process will be forthcoming and include multiple opportunities for the profession and the public to provide input into the revision process of ACPE's Accreditation Standards and Key Elements for the Professional Program in Pharmacy Leading to the Doctor of Pharmacy Degree. These new standards will be known as "Standards 2025."

III. Accreditation Actions for Providers of Continuing Pharmacy Education.

The ACPE Board of Directors accepted the report of the ACPE Continuing Pharmacy Education Commission at the January 20-23, 2021 meeting. Results of the evaluation of submitted applications and ACPE-accredited providers reviewed for reaccreditation by the Commission were presented to the ACPE Board of Directors in January 2021. These are depicted in these Report of the Proceedings as follows:

1.	Accreditation of New Applications: Organizations seeking ACPE-accredited provider status are asked to submit an Application for Initial Accreditation. This application asks questions regarding the applicant's experience relative to areas addressed by ACPE's standards for continuing pharmacy education. Initial terms of accreditation are usually for a short term with a First Review in 1 year and a Second Review in 2 years

4.	Consideration for Continued Accreditation on the Basis of Comprehensive Reviews. The submitted Self-Assessment Report undergoes a CPE Commissioner review, an internal (ACPE staff) review, an external (Field reviewer) review, a review of all records including correspondence, Activity Description Forms (ADFs), complaints (if any) and third party comments. The Comprehensive Review for Continued Accreditation provides the basis for the Council's action to continue the provider's term of accreditation. The standard term of accreditation is six years.

IV. Accreditation Actions for Joint Accreditation for Interprofessional Continuing Education™

ACPE made 18 accreditation decisions and nine progress report decisions for Joint Accreditation for Interprofessional Continuing Education™. Five jointly accredited providers were reaccredited; four

providers need to submit progress reports within one year. Eleven initial applicants achieved Joint Accreditation for Interprofessional Continuing Education. Of those, seven providers need to submit progress reports within one year. Two initial applicants did not receive joint accreditation. For providers who submitted progress reports: eight jointly accredited providers demonstrated that all criteria have been brought into compliance and one jointly accredited provider needs to submit a progress report next cycle. These decisions have also been made by the Accreditation Council for Continuing Medical Education (ACCME) and the American Nurses Credentialing Center. The ACCME, ACPE, and ANCC collaborate to offer a single pathway for accreditation for organizations offering interprofessional continuing education (IPCE).

V. Certification and Precertification Actions for Professional Degree Programs based outside the United States of America and its Territories:

Certification and Precertification Actions

On the basis of self-study reports, interim reports, on-site evaluations, communications received from the institutions, as well as the comments and recommendations of the ACPE International Commission, the Board of Directors determined the Certification Status of the following professional degree programs, along with Certification and Precertification terms and conditions.

In order to be eligible for Precertification or Certification, the professional degree program in pharmacy must be part of an independent school of pharmacy, a school of pharmacy within a university, or other structure approved by the Board. The school or university must be a postsecondary educational institution that is regularly incorporated, legally empowered, and authorized to award such a degree in accordance with national and/or regional laws and regulations. The institutional environment or setting for the professional degree program must be equivalent to a university and include a mission that encompasses professional education, scholarship, research, and service. To be granted Certification, the school of pharmacy must have graduated at least one class of students from the professional degree program in pharmacy for which Certification is being applied. Evaluation for purposes of granting or continuing of Precertification or Certification by ACPE requires an invitation by the chief executive officer or designate of the institution.

To apply for Precertification or Certification, a school must submit an application, a self-study report of the program, and any additional materials specified by ACPE. After receipt of the application, self-study report, and other required materials, a preliminary review of the application is carried out to confirm eligibility and evaluate the application. The findings and conclusions from the review are presented to the International Commission, which in turn makes a recommendation to the Board regarding authorization of an on-site evaluation. If the Board authorizes an on-site evaluation, it is scheduled in accord with standard evaluation and operational procedures.

The customary review cycle (period between comprehensive on-site evaluation visits) for established certified programs is six years. The customary term for programs granted initial Certification is two years. The maximum term for programs granted Provisional Certification is two years. The dates indicated in parentheses for each college or school are the academic year¹ of the most recent determination² of Certification Status and/or Precertification or Certification term and the academic year of the next scheduled determination of Certification Status and/or term, and thus define the present Precertification or Certification term for the professional degree program.

¹ For consistency, certification cycles and academic years are named in accordance with the standard terminology used by ACPE for accreditation and certification activities and reporting. Academic years run from July 1 to June 30.

² Determination includes granting of Certification Status, a change of Certification Status, a continuation of Certification Status (new term), and other changes of a certification term (e.g., shortening); it does not include affirmation of an existing Certification Status and term.

The Certification and Precertification actions are as follows:

For Purposes of Considering Authorizing an On-Site Evaluation Visit for Certification

The Board authorized on-site evaluation visits for the following programs: **none**.

For Purposes of Considering Granting Certification

The Board granted Certification to the following programs: **none**.

For Purposes of Considering Granting Precertification

The Board granted Precertification to the following programs: **none**.

For Purposes of Considering Continued Certification (after initial two-year term)
